## Entry of Amendment

Applicant's amendment filed on Apr. 28, 2003, as Paper No. 7, is acknowledged. Claim 10 has been canceled by the applicant, thus claims 1-9 and 11-12 are currently pending.

## Prior Rejections or Objections

The following comments pertain to the rejections or objections in the most recent Office action, Paper No. 5, mailed on Jan. 7, 2003. Rejections under 35 U.S.C. 102 with to the Hill et al. reference are withdrawn, however, the 102 rejections with the Lesser et al. reference are maintained for the following reasons. The affidavit to negate the Hill et al. reference is accepted. However, the affidavit to establish the invention was conceived and reduced to practice prior to the filing date of the Lesser et al. application is not acceptable at this time. The examiner requested via a telecon with Leana Levin, additional proof, such as drawings, descriptions, etc., that would more precisely define the invention was so conceived. A response in writing was not received by the time limit of June 11, 2003, therefore, the Lesser et al. rejections are repeated below.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 09/905,715

Art Unit: 3739

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 and 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lesser et al. (6,248,126).

As to claims 1 and 11, Lesser et al. disclose a method for treating a patient having epilepsy comprising:

locating a focal site that is the source of an intractable focal seizure, the focal site being located on a brain's neocortical surface;

establishing direct physical contact between the focal site and a cooling means: and

activating the cooling means and cooling the focal site to abort the intractable focal seizure (col. 1, line 15-col. 2, line 22, col. 3, lines 1-32, col. 4, line 56-col. 5, line 3, col. 5, lines 27-55, col. 7, line 28-col. 8, line 44 and col. 9, lines 14-30). Note that claim 10, is identical to claim 1, except for "rapidly" in line 7, which is a broad and undefined limitation that does not patently distinguish claim 10 over claim 1.

As to claims 2-3, Lesser et al. disclose that the focal site is determined by a cortical mapping process accomplished by establishing physical contact between a focal site and a cooling means and activating the cooling means to cool the focal site and eliminate the site as a seizure origin site (col. 7, lines 28-50 and col. 8, lines 33-44).

As to claims 4-7 and 12, Lesser et al. disclose manual activation of a Peltier chip to a temperature between 24-30 °C, which is a decrease of 7-13 °C (col. 9, lines 26-30).

Application/Control Number: 09/905,715

Art Unit: 3739

As to claim 8, Lesser et al. disclose activating at a frequency and duration so that

Page 4

the seizure is reduced (inherent in the process since the objective is the same as

claimed by the applicant).

As to claim 9, Lesser et al. disclose that the activation step is determined by a

seizure detection (col. 8, lines 33-44).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Roy D. Gibson whose telephone number is 703-308-

3520. The examiner can normally be reached on M-F, 7:30 am-4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Linda Dvorak can be reached on 703-308-0994. The fax phone numbers

for the organization where this application or proceeding is assigned are 703-872-9302

for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-308-

0873.
